

# Eye-Housing

## – Housing Stock Management

**When it comes to collating and maintaining information are you confident your systems are efficient and effective?**

*Eye-HOUSING* integrates all property/floor, ground, tenancy and neighbourhood information together making it available through one common interface. Integrating data from a wide variety of sources such as paper maps and spreadsheets, tenant databases, housing and grounds management systems, streamlines business processes. This enables better informed decisions to be made quickly and effectively for:

- Property Management** (including Asbestos Register)
- Land Terrier**
- Grounds Maintenance** (integrate landscaping design and planting schemes)
- Neighbourhood Analysis**

### Key Features:

- Ø Integrate **Housing, Tenant, Terrier, Ground / Estate, Demographic, Architectural and Design (CAD), Asbestos, Anti-Social, Stock Condition Survey** information including photographs, videos and floor plans.
- Ø Share the right information with the right people both **internally and externally**, using maps and textual reports.
- Ø Use Redline Annotation to **highlight problem or discussion areas**.
- Ø Produce E-Plot maps and reports
- Ø Link **OS MasterMap** building footprint data to your housing and tenant databases, enhancing the visual appearance
- Ø Proven **Autodesk** technology - based on Autodesk's established MapGuide information management technology
- Ø **Intranet Designed** - allowing organisation-wide controlled access to Housing, Terrier, Grounds and Neighbourhood information over your network or even via a password protected extranet.
- Ø Link to your current **Internet** site to supply specific customer information.
- Ø **Data Access** - link to AutoCAD based information, Autodesk® Architectural Desktop (ADT), AutoCAD Map 3D®, Microsoft® Office (Excel, Word, etc.), as well as numerous other applications and almost any SQL database (Microsoft® Access, SQL Server, Oracle, etc.)
